Riverside Community — WhatsApp Intelligence Report

Aggregated, de-duplicated digest across 3 WhatsApp group(s) — processed fully offline on a local model.

💬 142 unique messages

👥 18 participants

📅 6 events

😊 Net sentiment +45.8

EXECUTIVE SUMMARY

Community activity was healthy and collaborative across the three groups this period, with 142 unique messages from 18 members. Conversation centred on the upcoming Wellness Workshop and the Community Day clean-up, both of which drew strong volunteer sign-ups. Sentiment was largely positive; the only friction was a brief, respectful disagreement over the new event-fee policy, which resolved constructively. Five topics were forwarded across multiple groups and de-duplicated for this report.

GROUP DIGESTS & CONVERSATION HEALTH

R

Riverside Community Volunteers HEALTHY

64 messages · Positivity 79/100 · Argument. 14/100 · high collaboration

The busiest group, focused on organising the Community Day clean-up and the Wellness Workshop. Coordination was smooth and members were quick to volunteer for setup and registration roles.

- 5 volunteers confirmed for the June 14 setup
- First-aid refresher praised by attendees
- Discussion on recruiting weekend volunteers

🔄 Repeated topics: [Community Day logistics](#)

D

Downtown Wellness Group MIXED

47 messages · Positivity 71/100 · Argument. 28/100 · one resolved disagreement

Supportive, knowledge-sharing tone with daily wellness tips and a shared recording of the nutrition talk. A short debate on introducing a small class fee stayed civil and ended in agreement to trial it.

- Nutrition talk recording shared
- Civil debate on class-fee policy
- Morning-stretch tip thread

C

City Run Club Organizers DIFFERING OPINIONS

31 messages · Positivity 68/100 · Argument. 33/100

Planning the Beginners Training Session and finalising the new running route. A recurring route debate resurfaced but was settled after referencing the updated plan.

- Beginners Training Session scheduled
- Route plan finalised
- Pacer mentors requested

Riverside Community — WhatsApp Intelligence Report

Reporting period 01 Jun 2025 – 21 Jun 2025 (20 days) · 3 group(s) · 142 unique messages · generated 06 Jun 2026, 14:50.
Processed entirely on-device — text & event posters read with Tesseract OCR and a local vision model; categorisation, sentiment and conversation-health scoring used a local **qwen2.5:3b-instruct** model; cross-group de-duplication via nomic-embed-text semantic similarity. No data left this machine; no cloud AI was used.
Sentiment net score = (positive – negative) ÷ total × 100, over the unique message set.
